What is Collective Medical?

Collective Medical empowers physicians, nurses, and other care providers to improve the quality and efficiency of patient care through actionable real-time patient notifications. Collective’s nationwide network of engaged care team members offers transparency for providers through patient histories and collaborative care plans—identifying vulnerable patients in real-time and helping care teams address their needs at the point-of-care.

An Effective Collaboration Network

Collective helps providers across the country address key issues like substance use disorder, value-based care optimization, collaboration with behavioral health, workplace violence prevention, and ED optimization.

With Collective Medical’s care collaboration technology:

- Mat-Su Regional Medical Center reduced opioid prescriptions written by 80% within three years of implementation
- CHI St. Anthony reduced all-cause 30-day readmissions by 78%
- Sturdy Memorial Hospital reduced ED utilization from behavioral health patients by 78%
- Sutter Medical Center Sacramento reduced incidents of both physical and verbal assault by 40%
- The State of Washington reduced Medicaid ED visits by 10% year over year, resulting in $34 million in total savings

Collective supports all points of care, including:

- Hospitals
- Emergency Departments
- Primary Care Practices and FQHCs
- Mental and Behavioral Clinics
- Skilled Nursing Facilities
- Community Services
- Substance Use Disorder Clinics
- ACOs
- Managed Care Organizations
- Health Plans
## Solutions for All Points of Care

<table>
<thead>
<tr>
<th>Category</th>
<th>Description</th>
<th>Example</th>
</tr>
</thead>
<tbody>
<tr>
<td>Substance Use Disorder Support</td>
<td>Connect patient utilization and prescription histories across care settings to flag patients at risk for substance use disorder and collaborate with providers and other resources on the path to recovery.</td>
<td>Barlett Regional Hospital achieved a 63.6% retention rate for its SUD program—15% higher than the national average.</td>
</tr>
<tr>
<td>Value-Based Care Optimization</td>
<td>Improve transitions of care and reduce readmissions by identifying at-risk patients and collaborating in real-time with hospitals, skilled nursing facilities, home health and other post-acute providers to support and track these patients post-discharge.</td>
<td>Columbia Medical Associates reduced ED utilization by 15%—resulting in an estimated $6.5 million reduction in care costs.</td>
</tr>
<tr>
<td>Behavioral Health Integration</td>
<td>Achieve better patient outcomes for those struggling with mental or behavioral health concerns with groundbreaking consent functionality for real-time communication between providers across the healthcare spectrum.</td>
<td>Mid-Valley Behavioral Care Network achieved a 75% seven-day follow-up rate for behavioral health patients post-discharge. The national average is 18%.</td>
</tr>
<tr>
<td>Workplace Violence Prevention</td>
<td>Take control of workplace safety by receiving immediate notifications whenever a patient with a history of or risk for violence—including physical assault, verbal threats, theft, sexual assault, and self harm—presents.</td>
<td>CHI St. Anthony increased workplace violence reporting rates by 20%, qualifying for much-needed funding to establish a security facility.</td>
</tr>
<tr>
<td>ED Optimization</td>
<td>Increase efficiency and improve patient outcomes by minimizing unnecessary ED utilization, streamlining care, and increasing cost savings with access to patient histories and care guidelines integrated directly into existing workflows.</td>
<td>Legacy Salmon Creek Medical Center reduced ED visit rates for patients with high utilization by 81%.</td>
</tr>
